# Happy Valentine's Day

This month I have decided to open my article with a brief history of St. Valentine's day.

In the middle of February the ancient Romans celebrated Lupercalia which was a fertility festival. Between 200 and 300 A.D. at least two Christian clerics that were known as Valentine were martyred. In the late fourth century Pope Gelasius declared February 14 as a day for honoring Saint Valentine.

Then in the 1300's St. Valentine's Day became associated with love and romance. In the 1600's Europeans embraced the tradition of exchanging valentines and in the 1840's the United States started mass producing valentine cards.

Each year over \$450 million is spent on cards, candy and gifts for our sweethearts... seems to me somewhere along the line there must have been a St. Harley and a St. Davidson.

Enough with history, the year seems to be getting off to a good start, the Board Of Directors (BOD) are working together to make sure we have a very fun year, the Events Calendar is loaded with ideas and destinations to the end of the year, but there is still room to schedule in other ride and events to fill in some of the spaces, if you have any ideas for a ride or destination please do not hesitate to let our Activities Officer or Head Road Captain know.

We will be starting our **Summer Run planning meetings on February 9<sup>th</sup> at the Round Table Pizza in the Raleys Center in Rohnert Park at 6:00 pm.** We will need several volunteers to help make sure this is once again a fun and successful event, it would also be to our benefit to have a dedicated Coordinator to organize volunteers and see this event through to the end. Anyone with a desire to help is encouraged to attend. The meetings will continue at the same time and location on the second Thursday of each month until our main event is over. The date for the Summer Run will be August 19<sup>th</sup> and our destination will once again be the picnic area below the dam at Lake Sonoma.

## Let's ride and have fun!

I don't know about y'all but I'm ready to get some rides in. January was a little too rainy for my liking but I can't complain since it did get us out of the drought. I'm sure some of y'all are itching to roll the bike out of the garage and hit the road. Well after having the chance to meet with the other officers and road captains in the chapter, I'm confident that y'all will have your fill of rides and events these next few months. I want to assure y'all that we are doing our best to bring everyone in the chapter a good variety of rides. Some of the things to look forward to are over-nighters, a cruise, camping trips, and of course our chapter picnics. One of the few things that we decided to bring back is our chapter Spring Run. More details will follow as we iron out the plans.

Just as we're settling back into riding again, don't forget to check out a few things. First off, make sure y'all are current on your National HOG and chapter memberships. Other than being a requirement, you don't want to miss out on your HOG benefits. To see a list of benefits that go with your National HOG membership, you can log on to [www.members.hog.com](http://www.members.hog.com). Secondly, I'm sure some of y'all's bikes have been sitting in the garage for a while now. Don't forget to do your pre-ride checks and make sure you have a fully functional and safe Harley Davidson motorcycle. Sonoma County Harley Davidson is always available to guide and provide you with your parts and service needs. Remember that safety is our number one priority.

I look forward to seeing y'all on one of our rides. As always, if you have any concerns or questions, please do not hesitate to approach me or any of the other officers. We're here to make our chapter the best we can possibly can and to ensure everyone has a positive experience.

Ride hard. Ride safe.

Ian Refugio, Assistant Director

### RECHOG Ride & Cruise • 3 Fun Days on the open seas • September 22-25, 2017

We've put together a fun ride and cruise. Please join us! We will depart on Thurs, September 21<sup>st</sup> and ride to Long Beach. We will park our motorcycles in a secure parking garage and head to our hotel for the evening. Friday, we embark the Carnival Inspiration for fun on the open seas and visit Ensenada, Mexico. Upon our return on Monday, we will ride back home. Please let me know if you have any questions. My email is [secretary@rechog.org](mailto:secretary@rechog.org) or 707-479-8544. A Carnival Travel Specialist will be handling our reservations as she can arrange for us to dine together and try to put our cabins nearby. Please call Charlene Reisler at 800-819-3902, ext. 82937. Reference Jim Wheeler (Booking #5MN6L9) so she knows you're a part of our group.

Cruise Schedule: 9/22 – 9/25

Friday = Embark Ship, Departs 5:30pm

Sunday = Fun Day at Sea

Saturday = Ensenada Mexico, 8:00am – 6:00pm

Monday = Disembark in Long Beach, ride home

# Could this incident have been avoided?

I call it an incident because it could have easily turned into an accident with tragic results. Luckily for me it remained an incident. And yes, it could have been avoided. Over the last couple of years I have been on several long-distance trips and have stories that I want to share. I will start with the last one that occurred. I was going to write this story right after it happened but didn't for a couple of reasons. One, I was busy moving into my new house but also because I was embarrassed that I made this mistake. I had been packing my luggage for basically the same way on many trips that made up of thousands and thousands of miles and never had a problem. I would always check and recheck to make sure everything was secure before heading out. I packed everything the same way so many times that I quit really thinking about it. That was the mistake. So here's how this happened. I had expanded this piece of luggage to accommodate my chaps, leather jacket and heated liner and the bungee cords I was using fit tightly with all of that in there. But the morning I was getting on the road I was wearing my chaps, jacket, and liner and thought the bungee cords were tight enough but obviously they weren't because my luggage slipped down onto the fender and worked its way between the rear fender and the tire. As I was riding, everything in my luggage was getting chewed up! In thinking back as to how this could have happened, I believe it was because I experienced a pretty good bump in the road and because bungee cords stretch it allowed the luggage to slip down. I did not realize this had happened until one of my tennis shoes in the luggage got caught between the tire and fender which caused a screaming noise and the rear tire to lock up. I was riding on the freeway and I can't tell you how lucky I was not to lose control and go down. I attribute that primarily to riding a bike that fits me. A motorist had to help me pull things out from under the fender, it was jammed in there so tight I couldn't do it. Then I was able to get the bike onto the shoulder and had it towed to Mt. Diablo HD, I was only a few miles from there and almost home from a 2 week trip. I had the bike thoroughly inspected, I wanted to be sure there wasn't any damage to the wheel, etc. Between the items that were ruined and having the bike inspected, it cost me about \$500.00. It won't be long before we are all doing a lot of riding and going on trips and I hope by sharing this story you will think and re-think how you are packing and securing your equipment to see if there is room for improvement. I have decided to replace bungee cords with straps that don't stretch and get a net that will go over everything. I also learned that the loops on HD luggage can connect to each other which would make things more secure. We have new riders in our club who probably don't have much experience in riding with luggage so if you have any advice please be sure to share it! Have fun and be safe out there....

# Group Riding 101

Few activities build camaraderie and memories faster than Chapter Rides. They are one of the “Core HOG” Chapter Activities. We all know riding a motorcycle is all ready inherently unsafe and lets dispel the “myth” that riding in a group of motorcycles is not any safer. That’s why it’s so important that we place a lot of importance on “Conducting them safely.”

A pre-ride discussion of your plans, preferences, and requirements helps everyone avoid surprises. Talk about a pace (road speed limits), hand signals, details like fuel stops and routes, road changes, construction, and make sure everyone gets to offer something. It’s always good to have an experienced or confident rider at the back of the group to sweep the ride and attend to those who have problems. He/She should have a cell phone to call for help. A map provision for the ride is always helpful.

**The Flying Formation** The basic group riding formation is familiar to most riders. The lead rider rides to the left of the lane, with the second rider to the right and a few lengths back. The third rider is a similar distance behind the second, and so on. This staggered formation leaves room for each bike to swerve to the side and provides reaction time to brake. “From the beginning to the end of the ride all riders will maintain their position and not advance unless the rider ahead indicates to do so” When roads get twisty or narrow, you should open up into a single-file formation. When you come to a stop at an intersection, tighten up into a two-abreast configuration at the stop as this will keep cars to the rear of the group and prevent passing in the lane. While it is tempting to block an intersection so your entire group can go through, is against the law in the state of California. So is leaving in large bunches at a time from a four-way stop (which is considered two or more) is a request for a citation.

**Freeway or Multiple Lane Road Traveling** Its not only the law in California but its out of respect to the other drivers traveling in and around the group to keep the group to the middle lane so as faster traffic can pass to the left and slower traffic can exit the highway or road way. Remember the “left lane” in many states throughout the US are “passing lanes” and are not “traveling lanes” so keep to the right and maintain traffic speeds.

## Riders Responsibilities:

Pre-trip inspection of their bike is complete before the ride.

Arrive Prepared.

Family member, friend, or significant other knows your check in points along the ride.

Knowing the ride route and where it is going to take the group.

Full load of fuel in the tank.

Knowing the use of basic hand signals.

Don’t break the law trying to catch the group.

Knowing your own skill level and not try riding beyond it.

Make sure the Road Captain and Sweep know that you will be leaving the ride early.

Being Safe and Having Fun.

“Keep the shiny side up and the rubber side down”

Vincent Mulligan “Safety Officer”

## HOG HISTORY:

H.O.G. National was founded in 1983. It went International in 1991. We now have 1,099,214 members world wide with 1400 HOG chapters in North and South America, Europe, Middle East, Africa, Asia, Japan, Australia, New Zealand and more.

The average HOG member spends 30% more than other Harley owners! In our chapter alone that's approximately \$1.3 Million! Unfortunately for our sponsoring dealership we did not all buy our bikes, upgrades, motor clothes, gear and accessories in the same year, nor all from this dealership alone. Nevertheless, it is a good thing to support our sponsoring dealership when we can. They support us.

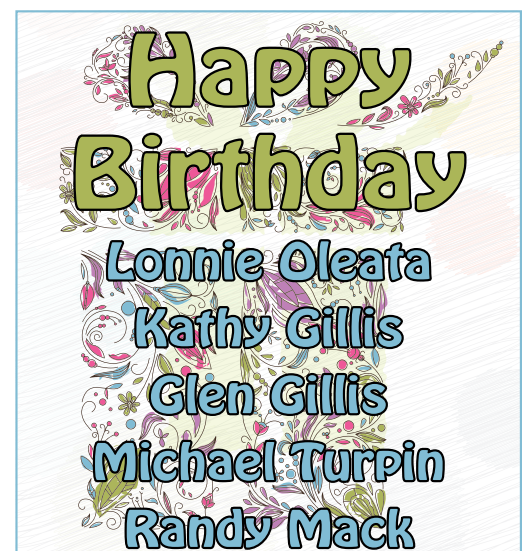

## REC-HOG HISTORY:

Redwood Empire Chapter HOG was established on June 2, 1988 with 10 Charter Members. The director was Sam Marovich. The chapter was sponsored by Michael Leskar, owner of Michael's Harley-Davidson in Santa Rosa. By 1989 the chapter had grown to 50 members. They had monthly rides, and their 1st poker run of 300 riders raising money for the Muscular Dystrophy Assn., the National HOG Charity. (to be continued)

## MOTOR CO. HISTORY:

Harley- Davidson History: As I reported at our last chapter meeting we're all aware that the company got it's start in 1903. But that year they only made 3 bikes! And only 8 bikes in 1904. In 1907 the 1st V-twin prototype and sprung fork were developed. Not until 1909 did they make 1,149 bikes. 1909 also saw the magneto ignition, mechanical inlet valves in 1911, chain drive in 1912, mechanical oil pumps appeared in 1915 along with electric lighting and a 3 speed gearbox. The V-twin disappeared in 1910, the first year of the Harley's Bar and Shield trademark! But the V-twin re-appeared in 1911. (to be continued)
