**RECHOG HOLIDAY PARTY**

## THINGS ARE HAPPENING

Hello My Fellow Members, quite a lot has been going on over the past month and there is still plenty more to come!

I have been working with the Hilton Round Barn for the 2017 Holiday Party, not all details are settled yet but I am trying to keep things as fun and in-expensive as possible. The date for this years event will be December 2nd at 6:00pm. I will have a block of rooms held at a rate of \$109 for the night of the event for those wishing to stay, the event ticket price has not yet been determined but I am working on keeping it as low as possible ( THE LOWEST IT HAS BEEN FOR THE PAST SEVERAL YEARS).

Unfortunately the number of entry tickets for the party will be capped off at 80 which I see as being quite reasonable due to the small number of members our group has. A discount will be given to Marathon Volunteers because it is from their efforts we will have the funding to put on this event. More information will come out as plans proceed.

The list of volunteers for the San Francisco Marathon is looking better, at this writing we have half of the number needed to fill our positions and half of those volunteers have agreed to help out with a second shift that the Marathon co-coordinators have agreed to pay us an additional \$90 per person for those that help. Remember S.F. Marathon volunteers will be eligible for a discounted Holiday Party ticket.

Our Summer Run is also starting to shape up very well, the route, entertainment, food and refreshment as well as other vendors are getting set and ready for OUR big event, however we still need much help from chapter members to help make this a successful event, help will be needed with parking and traffic control at the dealership, registration, ticket sales at the dealership as well as at the lake (prize, 50/50 and quilt tickets) and we will need a number of Road Captains and Sweeps to lead our guests on our route to Lake Sonoma.

Unfortunately I must take this time to spread some sad news, recently Past Director Wanda Fisher has passed away. Wanda joined the chapter in 1992 and served as the Director in 1993 and 94, which is significant because she was the second female to serve as a HOG Chapter Director in the United States. Her daughter informed me that her wishes were to go on a final ride around a few of the roads in the western county. Please join me and her daughter Celia as we fulfill Wanda's wishes on July 8. We will meet at the Dealership at 10:00 am and depart at 10:30 for a ride up the coast and back in through Occidental to the dealership.

On a lighter note, on the target event to Golden Gate HOG's Flag Day Ride, we rode away with another First Place Plaque, sadly not for Chapter Participation but for the unparalleled pig launching and catching skills of Ian, Paul, Smaggy and Mark. A big THANK YOU to every one that attended this event. There are still a couple of these target rides to attend this year, please make an effort to attend, not only is our support vital to these neighboring HOG Chapters, it encourages them to come support our Summer Run, besides they are a lot of fun and it gives an opportunity to ride some roads that are out of our normal riding area... so what say you?

LETS MAKE SOME NOISE!!!

## Hello RECHOG!

June was fun! We had a lot going on. We visited two other HOG chapters in the bay area; Livermore and Golden Gate. Livermore HOG had their Summer Ride on the first weekend of June. It was a nice ride to and from Livermore Harley-Davidson. Those who attended enjoyed the poker walk around the dealership, a beautiful ride on winding roads that brought us right underneath the Livermore wind farms, and of course the free burrito and taco lunch. The weekend after, we went down to see Golden Gate HOG for their annual Flag Day Extravaganza. We had hoped more of our chapter members would have showed up but we had a nice day of riding nonetheless. Through the efforts of some of our members, we took home 1st place on the chapter challenge, AGAIN! We hope that brings our chapters score up from previous B.A.D. events. The next B.A.D. target ride will be heading down to Oakland HOG on July 15th. We hope y'all can come join us. The San Francisco Marathon is on July 23rd. We are struggling to meet our goal of 50 volunteers. If you are able to come out and help OUR chapter out, please let our chapter director know. You can reach Dave McCombs at [director@rechog.org](mailto:director@rechog.org). The moeny raised from the marathons helps fund our Christmas Party. The more effort we put into the marathons, the better our Christmas Party turns out. This is your opportunity to step up to the plate and show your fellow members that you are invested in our chapters fundraising efforts.

The plans for our Summer Run event is coming along nicely. Our small group of volunteers are working hard to make sure we put together a great event we can all be proud of. If you have any ideas on something you would like to see happen, please do not hesitate to bring it up anytime to any of the officers or you can attend the Summer Run planning meetings every 2nd Thursday of the month. One thing to remember is that our Summer Run event is exactly that..... OURS! We need your help.

I look forward to seeing y'all on one of our upcoming rides. Get out on your Harley-Davidson and have fun! Remember, each member can invite one guest to our chapter rides. As always, if you have any concerns or suggestions, please do not hesitate to approach me or any of the officers. We welcome any new positive ideas that are beneficial to our chapter. We are here to make our chapter the best we possibly can, and to ensure everyone has a positive and safe experience.

"Ride safe. Ride hard"

What saloon in Sturgis, South Dakota has part of the name of a Harley Davidson engine as its name?

Answer: Knuckle Saloon  
The Knuckle Saloon is located in  
downtown Sturgis, SD. The Saloon was  
once owned by Samuel D. Sturgis.

## Tire Failure...and Manufacture Defect isn't one of them!

Nothing is more “Frustrating” than a tire failure or tire problem requiring and unplanned, early replacement of a new tire. We often think that when this happens the issue was most likely a “Tire Defect” when the tire was (born) manufactured, but often this is not the case in 99% of tire failures. Manufacturing defect, poor quality, or poor materials are rarely the case of tire failures when you are purchasing high quality tires from a reputable tire dealer and installed properly. 99% of the time, the cause of a tire failure leading to a possible blow-out or pre-mature tire replacement was completely avoidable with a little more care and attention during routine maintenance or while riding.

Riding while your tires are **under inflated** is one of the main causes of tire failures. Tires that are under inflated flex more in the side wall, excessive flexing causes the side wall to heat up beyond normal operating temperatures. This problem is compounded while riding during “Hot Weather” at freeway speeds during long periods of time or riding the twisties. When tires get excessively hot, the rubber begins to degrade, which if driven long enough, will lead to tire side wall cracking, splitting, or tread separation and then tire side wall failure.

Road hazards, if you are riding at 50-60 mph (two up or single rider bike loaded) and you hit a pothole or run over a road obstacle the tires take the full brunt of the impact. If the impact was hard enough, the side wall of the tire will compress and will be squeezed between the object and the wheel flange. This is called “Pinch Shock” and can cause a chunk of tire to come off or a large crack to begin to form in the inside wall of the tire where the cords have been broken and lead to a side wall bubble. Why is the side wall of a tire so important? Front Tire Side wear is a normal band of wear evident on the sides of the tires at the most common lean angle for that motorcycle. It is caused by the interaction of the pavement and the tires in a turn. When you turn, your bike really wants to go straight (Newton's First Law of Motion). You apply a force to make a turn, because of your wise desire to stay on the curving road. The bike's desire is to keep going straight, the natural and inertial centrifugal force in this interaction and the force resisting the inertia making the bike turn to follow the road is the Centripetal force.

The rear tire of a motorcycle is where most of the load of the bike is stored, and if the bike is being constantly over loaded with under inflated tires then you are over-taxing the rear tire!

## Rec-Hog:

June has brought us warmer and even some hot weather. And July looks hotter. But no worries, it just means more riding hugging the Pacific Coast line. If you do venture further inland eastward or into other states you might want to consider donning a cool vest and a neck cooler. And keep hydrated! We have some great Rec-Hog members who are experienced riders. full of good advise regarding routes and weather. You are encouraged to ask them or any of your Rec-Hog officers.

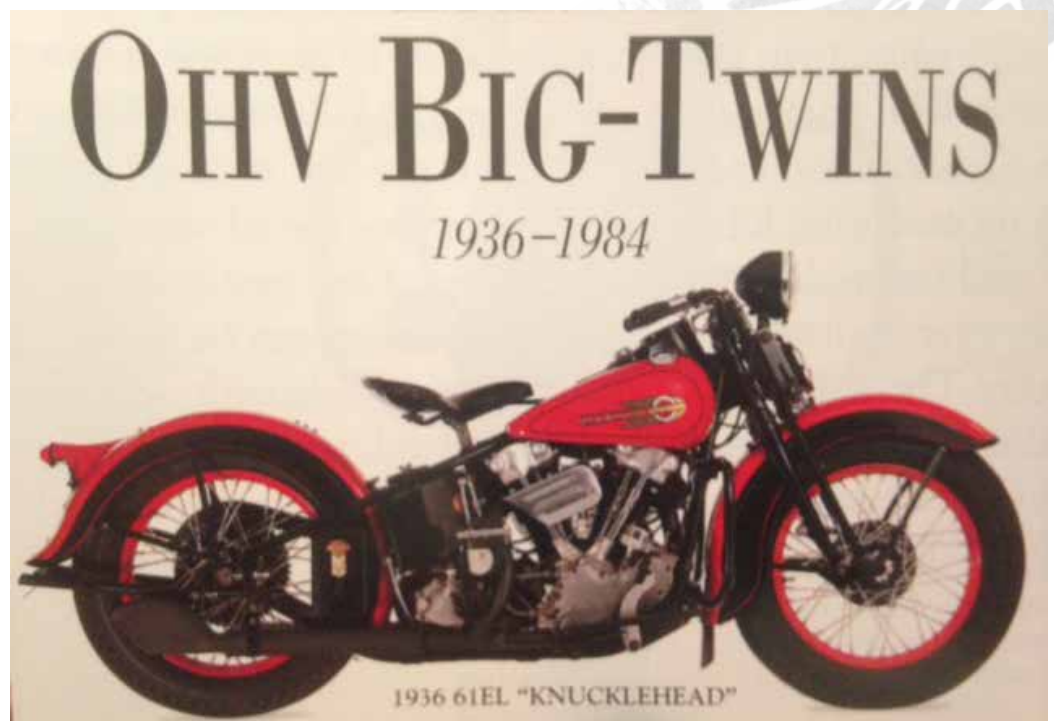

## Rec-Hog History:

In the years 2000 and 2001 Michael Loomis was the director. And they raffled a new Softail Heritage in pearl white. The proceeds went to help a new Children's Home in Sonoma Co., for which the chapter received a commendation from the County.

On Dec. 24th, 2000 a couple of the Rec-Hog members were seen along side the 101 freeway stomping the stuffing out of a teddy bear! They had started out for the annual toy run to the Valley of the Moon Children's Home. The teddy bear was securely tied to the front of the bike over the headlight. As they rode down the freeway the headlight continued to heat until the teddy bear burst into flames. Upon removal the stomping ensued. This became know as the Tale of The Flaming Teddy Bear.

## Harley-Davidson History:

In the 1930's the movement was Art Deco, with a fresh use of color and styling. This inspired the company to move away from the green color schemes it had been using as its paint finishes since 1917. And one major new model introduced in 1936 embodied the movement's style and boldness, the 61E "Knucklehead". Although the general economic climate had improved by the mid 1930's, Harley's situation was still uncertain, so the decision to release, what is arguably the most significant model in Harley's history, was a risky one. The technologically advanced "Knucklehead" had a recirculating lubrication system, a four speed gearbox, and overhead valves with hemispherical combustion chambers. This bike is the direct granddaddy of today's big twins. But it's influence was more than just mechanical. The 1930's was the decade of streamlining, when aerodynamics was not a science but an art statement. The 61E epitomized the streamlined look. It was an integrated style that set the tone for the modern motorcycle.

# San Francisco Marathon 40<sup>th</sup> Anniversary

## 50 VOLUNTEERS NEEDED!!!

**Sunday, July 23, 2017**

Members and non-members are welcome! The Marathon is a major fundraiser for RECHOG as they donate a set amount to the chapter for each volunteer we bring. Director Dave has arranged for RECHOG to man the staging and starting area for the marathon. This is a prime location for us and very fun to staff! We are able to cheer on 27,000 runners as they head out for the ultramarathon, marathon, two half-marathons, or 5K run. Each volunteer will receive 50% off their ticket price for the December 2<sup>nd</sup> RECHOG Holiday Party, as a "Thank You" for supporting the Chapter. Direct any questions to Dave McCombs at [director@rechog.org](mailto:director@rechog.org) or by text at 707-696-1388 or Ian Refugio at [assistantdirector@rechog.org](mailto:assistantdirector@rechog.org) or by text at 415-858-9070. Please join us for this fun, early morning ride to the 'City by the Bay'!
